

Asahidake & Tenninkyō Information

"Nature Letter"

『Snow capped Mt. Asahidake』

Asahidake

The fall leaves on the Japanese Rowan have blown away and the first snow has fallen on Mt. Asahidake. The low shrubs, such as the Aleutian Avens, still have their autumn colors allowing you to photograph both autumn and winter.

『Frosty Aleutian Avens』

『Birchleaf spiraea』

Alpine Plants in the Sugatami Area

Aleutian Aven seeds

Japanese Gentians

Japanese Rowan Berries

Miquel's wintergreen

Japanese Crowberries

Early Blueberries

Tenninkyō

『From the foot spa in the car park』

『Along the path to Hagoromo Waterfall』

『Hagoromo Waterfall』

The autumn colors are reaching their peak.

The path to Hagoromo waterfall is mostly flat and takes about 40 minutes return. The walk is highly recommended at this time of the year.

There is a temporary toilet set up in the car park until mid-October

Useful Information

Temperature in mid-October: -7 ~ 6°C

※ Based on Asahidake Nature Keeper records

★ Bring a waterproof jacket and trousers when rain is forecast.

★ It is late autumn - early winter on the mountain

Hiking boots

Trekking poles

Down insulation

Hat

Thick Jacket

Gloves
